Project Planning Phase Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	30 October 2022
Team ID	PNT2022TMID28709
Project Name	Efficient Water Quality Analysis & Prediction using Machine Learning
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation:

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Stor y Point s	Priority	Team Members	
Sprint-1	Data Preparation	1	Collecting water dataset and pre-processing it	20	High	Sarojini M Murthima	
Sprint-2	Model Building	2	Create an ML model to predict water quality	5	Medium		
Sprint-2	Model Evaluation	3	Calculate the performance, error rate, and complexity of the ML model and evaluate the dataset based on the parameter that the dataset consists of.	5	Medium	⊣Anjani , Sanjana	
Sprint-2	Model Deploymen t	4	As a user, I need to deploy the model and need to find the results.	10	Medium		
Sprint-3	Web page (Form)	5	As a user, I can use the application by entering the water dataset to analyze or predict the results.	20	Medium	Sarojini M Murthima	
Sprint-4	Dashboard	6	As a user, I can predict the water quality by clicking the submit button and the application will show whether the water is efficient for use or not.	20	High	Anjani , Sanjana	

Project Tracker:

Sprint	Points	Duration	Sprint Start Date	Sprint End Date	Story Points Completed	Sprint Release Date
Sprint-1	20	6 Days	23 Oct 2022	28 Oct 2022	20	29 Oct 2022
Sprint-2	20	7 Days	29 Oct 2022	04 Nov 2022	20	05 Nov 2022
Sprint-3	20	7 Days	05 Nov 2022	11 Nov 2022	20	12 Nov 2022
Sprint-4	20	8 Days	12 Nov 2022	19 Nov 2022	20	19 Nov 2022

Velocity:

Sprint 1: 1 user stories x 20 story points = 20

Sprint 2: 1 user stories x 20 story points = 20

Sprint 3: 1 user stories x 20 story points = 20

Sprint 4: 1 user stories x 20 story points = 20

Total = 80

The average sprint velocity is $80 \div 4 = 20$.

Burndown Chart:

A burndown chart is a graphical representation of "WORK LEFT to do versus TIME". It is the amount of work that has been completed in an epic or sprint and the total work remaining. burndown charts are used to predict your team's likelihood of completing their work in the time available.
